**The Office of the State  
Chief Information  
Officer (OCIO)**

Auriga provided project management and coordination services to California's Office of the Chief Information Officer (OCIO) for developing a State Wide Data Strategy. The adoption of a statewide data Architecture strategy is a key ingredient in future data center consolidation and cost savings.

Auriga's scope of work included the following: review of the existing statewide data sharing environment, identifying data sharing risks, determining how to deliver accurate consistent data; defining a statewide data sharing approach and functional design for a single consistent source of data; producing a roadmap to implement the data architecture strategy; and developing pilot and statewide project recommendations.
