- Telecommunications Services
- Local and Wide Area Network Services
- Electronic Commerce and Electronic Data Interchange

Examples of Information Technology Clients

Microsoft Premier Support Services - Employment Development Department

Auriga Corporation in partnership with Microsoft is providing Premier Support Services to EDD in Sacramento. Auriga Corporation provided support for account; workshops to assist EDD with the prevention of problems, increasing system availability and assisting with creation of products and solutions based on Microsoft technologies; problem resolution support to provide assistance for problems with specific symptoms encountered while using Microsoft products.

California Children & Families Commission

Auriga provided on-site technical support (Network Administration and Helpdesk Support Services) to CCFC. Auriga Consultants were responsible for day-to-day operation and maintenance of servers and desktop/notebook computers of CCFC. In addition, Auriga was responsible for advising on network hardware issues, desktop hardware issues, and network and desktop software issues as part of "best-in-breed" hardware usage and software applications covering a wide range of systems which include workstations, network servers, printers, email systems, firewalls and routers.

San Mateo County Transit District/Peninsula Corridor Joint Powers Board-CALTRAIN

Auriga Corporation was awarded a five-year ongoing bench contract to provide consulting services for the Information Technology department. The scope of services included the business process mapping of procurement, development of an intranet, development of and interfaces between PeopleSoft ERP applications and legacy applications and data bases. Auriga also provides support for the data center and help desk operations.

Tools and Models

Over the years Auriga Corporation has used numerous IT tools and project models in order to meet our client's needs, still utilizing our proven methodologies and our vast experience in the field. Our standard tools include a suite of Microsoft products including Project, Outlook,

Word, and Excel. However, we have used wide variety of other tools including but not limited to, Primavera, CA Superproject, SAP PS, CriticalPath, Documentum etc. With the help of these tools, we consistently accomplish the key objectives of the IT team in implementing the selected project model. Auriga's experience includes the implementation of a set of IT and software development models including, gate models, spiral models, waterfall models, rolling wave work structure planning, and various other thick or thin models.

About Auriga

Auriga Corporation provides a wide variety of consulting services in the area of Information Technology, e-Commerce and Telecommunication Systems to local government agencies, State and Federal agencies and to private enterprises. The principal consultants have on the average more than twenty-five years of experience in IT and Telecommunications working for system suppliers and consulting firms, before joining the company. We have a combined experience of more than 200 man-years in the area of design specification, procurement, testing and commissioning of computer, control and communication systems both in the United States and other countries around the world, including India, Indonesia, Egypt, Hungary and Bosnia and Herzegovina. In addition, Auriga Corporation has a California Multiple Awards Schedule (CMAS) contract to provide IT and Telecommunications Services to all the state agencies in California.

Auriga is certified as a *Small Business* by the Office of Small Business, Department of General Services State of California. In addition, it is certified as a *Disadvantage Business Enterprise* (DBE) by the Bay Area Rapid Transit District (BART), Minority Business Enterprise (MBE) by the Supplier Clearinghouse for the Utility Supplier Diversity Program of the California Public Utilities Commission.

Washington Metropolitan Area Transit Authority

Auriga provided IT support services to the Washington Metropolitan Transit Authority (WMATA) for architectural design and development of two web sites (Largo and Dulles). Auriga successfully delivered design, implementation, operation and maintenance of LANs at various work sites and extranet administration and support for the WMATA.

Amador Water Agency, Amador County, California

Auriga redesigned and implemented a new LAN/WAN architecture to improve the functionality and efficiency of the Agency's information systems. The WAN provided secure wireless and wireline links to remote workstations. As part of the network planning, Auriga developed a five year strategic Information Technology Master Plan to guide the Agency in its IT planning.

Indonesia IT Implementation Plan

Auriga prepare a Technical Review of the country's IT infrastructure and made recommendations on what they must achieve in the future and how this can be realized utilizing American IT Technology.

Auriga also prepared a Detailed IT Implementation Plan which contains a comprehensive list and description of the IT programs, prioritized tasks, and milestones which addressed the Indonesia's needs now and in the future.

State of California

Auriga provided on-call consulting support and services to the Teale Data Center in Sacramento. The scope of work included application development, support on integration issues, network operating systems design and troubleshooting, and other consulting services as required by the State. Most recently, the State of California retained Auriga to provide a strategic-level assessment of the network architecture, infrastructure and operations for the California State Personnel Board. Auriga developed a prioritized list of short-term solutions as well as a framework for an overall strategic IT plan.
